FLSS Board Policy #4

Corporate Partnership Program*

The IAFC's corporate partner program provides a unique opportunity for the corporate community, the IAFC and its members to join together for the betterment of the fire and emergency services. Through unique partnerships, companies can encourage the development and exchange of ideas, improve communications with fire and emergency service leaders, present innovative products and services, and have a means for sharing expertise, resources and best practices with the private and public sectors.

Fire & Life Safety Section partnerships shall be established and maintained in accordance with the IAFC Policy Manual Section Partnership Guidelines. When the Fire & Life Safety Section is approached by a business interested in developing a partnership with the Section, or the Section initiates a conversation with a business about a possible partnership, a Section representative shall notify IAFC corporate development staff as described in the IAFC Policy Manual.

Current FLSS Section Partners in the following partnership categories shall be identified in the FLSS Section web pages. Additional sponsorship and recognition arrangements can be arranged based on agreement between a partner and the FLSS Executive Committee.

FLSS partnership annual contributions are as follows:

Executive Level Partnership (\$5,000)

General Level Partnership (\$2,500)

Basic Level Partnership (\$1,000)

Approved: March 26, 2009

Revised: July 15, 2020
