March 18, 2020

Dear Leader McConnell, Speaker Pelosi, Senator Schumer, Congressman McCarthy, Chairman Wicker, Chairman Pallone, Senator Cantwell, and Congressman Walden:

We write to strongly urge you to include language that would repeal Section 6103 in Title VI of P.L. 112-96 in any stimulus legislation related to the COVID-19 pandemic. Such language will prevent the Federal Communications Commission (FCC) from being forced to auction and clear public safety communications from critical spectrum known as the T-Band (470 MHz-512 MHz). As emergency medical service (EMS), fire department, police department personnel, and others work to keep their communities safe and healthy during the current crisis and in the future, it is imperative that these T-Band users know they will continue to have the resources they need to do their jobs on behalf of the public.

In eleven major metropolitan areas, T-Band systems support public safety voice communications.¹ This spectrum allows 911 dispatchers to send first responders to people in need; EMS teams to speak to each other; and firefighters to call for mutual aid. Local public safety agencies have used billions of dollars in federal, state, and local taxpayer funds over the past five decades to build T-Band systems that are interoperable and meet mission-critical voice requirements. It is expected to cost $5 to $6 billion for

¹ The affected metropolitan areas by population are New York, Los Angeles, Chicago, Dallas/Fort Worth, Houston, Washington, D.C, Miami, Philadelphia, Boston, San Francisco, and Pittsburgh.
public safety users to move off the spectrum, and auction proceeds are not expected to be sufficient to cover these costs.\(^2\) Of the eleven affected areas, five cities do not have alternative spectrum options.

Repealing the T-Band auction mandate is a public safety imperative requiring action from Congress. In June 2019, the Government Accountability Office released a study on the impact of the T-Band auction on first responder capabilities. The report found that, without access to the T-Band, public safety agencies may not be able to maintain communications or communications interoperability. The GAO recommended that Congress consider allowing public safety organizations to continue operating in the T-Band. In a public statement on December 2, 2019, FCC Chairman Ajit Pai agreed that the T-Band auction mandate “could deprive first responders of their current ability to communicate by radio” and concluded that “moving forward is not viable.”\(^3\)

In communities across the country, T-Band users are on the front lines of the COVID-19 pandemic. They are transporting patients, responding to emergency calls, and saving lives. We ask Congress to include the *Don’t Break Up the T-Band Act* (S. 2748/H.R. 451) in any legislative response to this ongoing crisis in order to preserve access to this critical communications resource.

Sincerely,
