

REGIONAL RAIL RESPONSE TRAINING

A Unified Coordinated Effort

Regional Rail Response training is designed to bring local and regional agencies together to better understand response efforts and roles should a derailment or incident occur.

ATTEND TRAINING.

GAIN EXPERTISE.

BE PREPARED.

Takeaways
from this
8-hour
session
include:

- An understanding of the response disciplines and associated roles during a response to a rail incident.
- Knowledge about the industry and rail lines within your region, including the commodities that are transported.
- An understanding about the need for a coordinated effort when responding to an incident, and how to effectively manage available resources.
- Experience in a group exercise to reinforce the training concepts around a train derailment scenario.
- 8 hours of credits towards your annual hazardous material training requirement through the IAFC Academy.

The Assistance for Local Emergency Response Training (**ALERT**) grant provides Hazardous Materials training opportunities for first responders. Check out the 2016 training offerings below, and visit the **HazMat Fusion Center** for more detailed information for each session.

June • Sayreville, NJ

July • Ocala, FL

July • Salem, OR

July • Byron, IL

August • Marion, IL

September • Blair, NE

October • Plymouth, NE

October • College Station, TX

October • Champaign, IL

October • Kennewick, WA

Registration Questions? Contact the IAFC Academy at Academy@iafc.org.

For a full list of the instructor-led trainings offered by the IAFC and partners under the ALERT Grant, as well as additional rail safety information, visit the HazMat Fusion Center at **HAZMATFC.com**.

For all other questions, please contact the IAFC PM for the ALERT Grant, Laura Peard at lpeard@iafc.org
